

# Environmental Policy

---

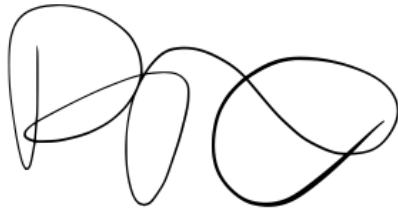

## **We care about our environment and our collective future**

Inline Drainage Limited undertakes to have an annual Environmental Compliance Audit on site to ensure all operational activities are being carried out as per environmental compliance requirements.

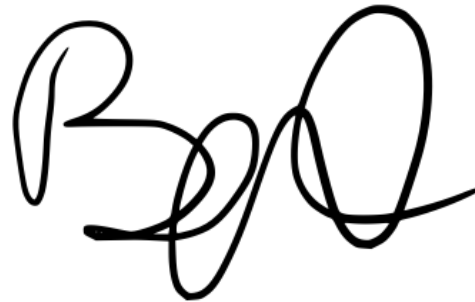

## **As our commitment to protecting and promoting environmental practices we will continue to promote the below:**

- Inline Drainage will manage all activities with concern for our local community and the environment while managing excavation and drain laying operations in a way that will ensure there is no adverse impact on the area we work and down stream areas.
- Complying with and operating in accordance with the approved resource consent conditions and applicable laws and regulations.
- Implementing environmental related safe work practices, systems and procedures.
- Understanding the environmental impact of the materials, plant and equipment we work with.
- Seeking employee contribution to identifying initiatives to improve environmental performance and contribute to a healthier and safer environment at our site.
- Working closely with our contractors and subcontractors to ensure they meet our expectations.
- Monitoring, control and record waste disposal in accordance with the resource consents and statutory requirements to minimise the impact on the environment.

- We aim to reuse where possible excavated material as backfill with the aim to reduce and reuse waste material.
